

TOUCAN ECO ACTIVE PLUS

Toucan Eco Active Plus bio cleaning and disinfectant generator is a greener way to clean small to medium sized facilities producing 5 litre batches of high quality solution in as little as 60 minutes. It is a safe, non-toxic and ecologically friendly bio-degradable alternative to traditional cleaning and disinfecting chemicals.

Toucan Eco Active is an electrochemical activation (ECA) cleaning and sanitising system that offers the most effective, money saving and environmentally friendly alternative for chemical-free cleaning. Its components of water and salt, when activated, produce a solution which is non-toxic and non-hazardous to people and animals. Simply make your own solution. Stringent tests undertaken by EU accredited independent laboratories and university research departments have shown it is 99.999% effective against all forms of microorganisms killing bacteria fungi, spores and viruses with a very fast contact time and virtually no regrowth.

The solution only has two components – water from the tap and table salt, which is dissolved in the water. The components are activated using a form of electrolysis whereby a small electrical current is applied to the solution using a specialised electrolysis cell. This produces hypochlorous acid, which is a powerful and safe disinfectant, and sodium hypochlorite solution, an effective cleaning agent. Together, they create a powerful, naturally-occurring disinfectant cleaner and sanitiser that's safe, non-toxic, non-allergenic, environmentally friendly and low cost.

A single activation will produce 5 litres of concentrated disinfectant and cleaning solution equivalent to around 33 x 600ml spray bottles.

The system includes a generator, 5 litre tank, brine salt dispenser, shelf and low/high flow proportional dilution dispensers. Fixings for generator and shelf are included.

Key features and Benefits

- Fast acting with a 99.999% kill rate.
- A powerful disinfectant and effective cleaner
- Environmentally friendly
- Cost saving, only a small amount of salt combined with water needed
- Non-toxic, non-hazardous.
- Meets the requirements of BS EN 1276 and BS EN 13697

Technical Data

Capacity	5 litres
Concentration	350 - 400ppm FAC
pH	pH 8 – pH 8.5
Time per batch	60 minutes
Max capacity	3x
Salt consumption	5 grams per batch
Power Supply	100w
Additives	Salt (NaCl) and water (H2O)
Active substances	Hypochlorous acid (HOCl) and sodium hypochlorite (NaOCl)
Accreditations	EU Biocide. BS EN 1276. BS EN 13697. Efficacy 99.999%

The Toucan Active and the solutions generated are listed with the European Chemicals Agency (ECHA) and are compliant with EU Biocides Regulations Article 95 No. 528.2012
